

AISHWARYA MOHANRAJ

(224) 454-3441 | aishu0743@gmail.com | Indianapolis, IN | www.linkedin.com/in/aishwarya-mohanraj | [Aismohan](#)
Health Informatics graduate student at Indiana University Indianapolis with a background in dentistry, public health data analytics, and biomedical research. Experienced in healthcare data analytics, Python, SQL, FHIR interoperability, and machine learning through research and interdisciplinary projects. Passionate about leveraging data and digital health technologies to improve clinical decision-making, patient outcomes, and healthcare delivery.

EDUCATION

Master of Science in Health Informatics Indiana University Indianapolis, IN
Bachelor of Dental Surgery SRM KDC, Chennai, India

Expected August 2027
December 2020

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, SAS

Data Analytics & Machine Learning: Pandas, NumPy, Statistical Analysis, Random Forest, Linear, Logistic Regression

Data Visualization: Power BI, Tableau, Matplotlib, Seaborn

Health Informatics: EHR/EMR Systems, Public Health Data, SDOH, FHIR, HL7 v2, SNOMED CT

Tools: PyCharm, Jupyter Notebook, MS Excel, Git/Github, MS Project, MS Office, Visual Studio Code

PROFESSIONAL EXPERIENCE

Research Assistant | Indiana University Indianapolis, IN

Sep 2025 – Present

- Analyze biomedical sensor datasets using Python and Visual Studio Code to support research on volatile organic compound (VOC) profiles for non-invasive disease detection.
- Develop and optimize data preprocessing and feature extraction workflows to transform raw sensor signals into structured datasets for statistical analysis and predictive modeling.

Student Ambassador – Health Informatics | Indiana University Indianapolis, IN

Oct 2026-Present

- Represent the Health Informatics program through student recruitment, outreach, and mentoring initiatives.

Public Health Data Analyst | Abrasives and Chemicals, India

Feb 2021 – Jul 2025

- Analyzed public health datasets using Python, SQL, and Excel to identify public health trends and risk factors.
- Performed data validation and quality assurance to ensure accuracy, consistency, and regulatory compliance across healthcare datasets.

Dentist and Clinical Data Analyst | SRM Kattankulathur Dental College, India

Sept 2019 – Jan 2021

- Used EHR systems to manage and analyze patient data, improving clinical workflow efficiency, and identified patterns in patient data to support preventive care and clinical decision-making.

PROJECTS

FHIR Healthcare ETL Pipeline

Jan 2026-May 2026

- Developed an end-to-end healthcare ETL pipeline using OpenEMR, FHIR APIs, SNOMED CT, and HL7 v2 to enable interoperable healthcare data exchange, and created a GitHub Pages website to document the ETL architecture and workflows.

Autoimmune Biomarker Analysis

Jan 2026-May 2026

- Analyzed a clinical dataset of 12,500+ patient records using R and statistical modeling (Welch's t-tests, Spearman correlation, logistic regression, and ROC analysis) to identify key predictors of autoimmune disease.

Childhood Vaccination Data Analytics

Aug 2025-Dec 2025

- Analyzed SDOH and childhood vaccination data across 92 Indiana counties using Python, SQL, statistical analysis, and machine learning (Logistic Regression and Random Forest) to identify population health trends.

MedMind – AI-Enabled Digital Mental Health Platform

Aug 2025-Dec 2025

- Designed an AI-enabled digital health platform to improve medication adherence through wearable integration and provider dashboards, developing HIPAA-compliant project plans, WBS, and a \$453K budget.
