Indianapolis, IN | aishu0743@gmail.com | (224) 454-3441 | www.linkedin.com/in/aishwarya-mohanraj | aishwarya-portfolio-ebon.vercel.app

PROFESSIONAL SUMMARY

Health Informatics graduate student with a clinical-to-informatics background, combining experience as a practicing dentist with applied expertise in EHR systems, FHIR interoperability, and healthcare data analytics. Proficient in Python, SQL, and R for clinical and population health analysis, with experience building data pipelines and applying standards such as SNOMED CT and HL7 v2.

EDUCATION

Indiana University Indianapolis <i>Master of Science in Health Informatics.</i>	Indianapolis, IN <i>Expected August 2027</i>
SRM KDC <i>Bachelor of Dental Surgery.</i>	Chennai, India <i>December 2020</i>

EXPERIENCE

Research Assistant, Healthcare Analytics and Biomedical Research <i>Indiana University Indianapolis</i>	Sep 2025 – Present <i>Indianapolis, IN</i>
- Analyze biomedical sensor datasets using Python (NumPy, Pandas) for VOC profile research on non-invasive disease detection. - Optimize preprocessing and feature extraction workflows to convert MOX sensor signals into structured datasets for modeling.	
Graduate Student Ambassador, Health Informatics <i>Indiana University Indianapolis</i>	Oct 2025 – Present <i>Indianapolis, IN</i>
- Build recruitment dashboards, conduct market research, and perform competitive analyses across Indiana universities. - Represent the Health Informatics program at recruitment events, mentoring students on curriculum and career pathways.	
Public Health Data Analyst <i>Abrasives and Chemicals</i>	Aug 2022 – Jul 2025 <i>Tiruchirappalli, India</i>
Analyzed public health datasets using Python, SQL, and Excel to identify population health trends and risk factors.	
EHR Analyst <i>Mahathma Gandhi Memorial Hospital</i>	Jan 2022 – Jul 2022 <i>Tiruchirappalli, India</i>
Managed EHR records documenting patient histories, diagnoses, and treatment plans to support continuity of care.	
Dentist and Clinical Data Analyst <i>SRM Kattankulathur Dental College</i>	Sep 2019 – Jan 2021 <i>Chennai, India</i>
Applied EHR systems to manage and analyze patient health information, ensuring clinical documentation and data quality.	

PROJECTS

FHIR Healthcare ETL Pipeline	Jan 2026 – May 2026
Built an ETL pipeline using OpenEMR, FHIR APIs, SNOMED CT, and HL7 v2 for interoperable clinical data exchange.	
Autoimmune Biomarker Analysis	Jan 2026 – May 2026
Analyzed 12,500+ patient records using R and statistical modeling (Welch's t-tests, Spearman correlation, logistic regression, ROC analysis) to identify autoimmune disease predictors.	
Childhood Vaccination Data Analytics	Aug 2025 – Dec 2025
Analyzed SDOH and vaccination data across 92 Indiana counties using Python, SQL, and machine learning.	
MedMind: AI-Enabled Digital Mental Health Platform	Aug 2025 – Dec 2025
Designed an AI-enabled platform with wearable integration and dashboards, with HIPAA-compliant plans and \$453K budget.	

ACTIVITIES & LEADERSHIP

Upward Bound TRiO, Indiana University Indianapolis <i>Mentor</i>	May 2026 – Aug 2026
Mentor high school students through academic coaching, career guidance, and college readiness support.	

SKILLS

Health Informatics: EHR/EMR Systems, FHIR, HL7 v2, SNOMED CT, SDOH, Public Health Data
Programming Languages: Python, SQL, R, SAS
Data Analytics and Machine Learning: Pandas, NumPy, Statistical Analysis, Random Forest, Logistic Regression
Data Visualization: Power BI, Tableau, Matplotlib, Seaborn
Tools: Jupyter Notebook, Git/GitHub, MS Excel, Visual Studio Code, MS Project

CERTIFICATIONS

- Walmart USA Advanced Software Engineering Job Simulation, Forage, Dec 2025
- Basic Life Support, American Heart Association
