PROFESSIONAL SUMMARY

Health Informatics graduate student at Indiana University Indianapolis with a background in dentistry, public health data analytics, and biomedical research. Experienced in healthcare data analytics, Python, SQL, FHIR interoperability, and machine learning through research and interdisciplinary projects. Passionate about leveraging data and digital health technologies to improve clinical decision-making, patient outcomes, and healthcare delivery.

EDUCATION

Indiana University Indianapolis <i>Master of Science in Health Informatics.</i> SRM KDC <i>Bachelor of Dental Surgery.</i>	Indianapolis, IN <i>Expected August 2027</i> Chennai, India <i>December 2020</i>
---	---

EXPERIENCE

Research Assistant, Healthcare Analytics and Biomedical Research <i>Indiana University Indianapolis</i> - Analyze biomedical sensor datasets using Python (NumPy, Pandas) for VOC profile research on non-invasive disease detection. - Optimize preprocessing and feature extraction workflows to convert MOX sensor signals into structured datasets for modeling.	Sep 2025 – Present <i>Indianapolis, IN</i>
Graduate Student Ambassador, Health Informatics <i>Indiana University Indianapolis</i> Develop recruitment dashboards, conduct market research, and perform competitive analyses across Indiana universities.	Oct 2025 – Present <i>Indianapolis, IN</i>
Public Health Data Analyst <i>Abrasives and Chemicals</i> Analyzed public health datasets using Python, SQL, and Excel to identify population health trends and risk factors.	Aug 2022 – Jul 2025 <i>Tiruchirappalli, India</i>
EHR Analyst <i>Mahathma Gandhi Memorial Hospital</i> Maintained EHR records documenting patient histories, diagnoses, and treatment plans to support care continuity.	Jan 2022 – Jul 2022 <i>Tiruchirappalli, India</i>
Dentist and Clinical Data Analyst <i>SRM Kattankulathur Dental College</i> Leveraged EHR systems to manage and analyze patient health information, ensuring documentation and data quality.	Sep 2019 – Jan 2021 <i>Chennai, India</i>

PROJECTS

FHIR Healthcare ETL Pipeline Developed an end-to-end ETL pipeline using OpenEMR, FHIR APIs, SNOMED CT, and HL7 v2 for interoperable clinical data exchange; built a GitHub Pages site documenting the architecture and workflows.	Jan 2026 – May 2026
Autoimmune Biomarker Analysis Analyzed 12,500+ patient records using R and statistical modeling (Welch's t-tests, Spearman correlation, logistic regression, ROC analysis) to identify autoimmune disease predictors.	Jan 2026 – May 2026
Childhood Vaccination Data Analytics Analyzed SDOH and vaccination data across 92 Indiana counties using Python, SQL, and machine learning.	Aug 2025 – Dec 2025
MedMind: AI-Enabled Digital Mental Health Platform Designed an AI-enabled platform with wearable integration, HIPAA-compliant architecture, and a \$453K budget.	Aug 2025 – Dec 2025

ACTIVITIES & LEADERSHIP

Upward Bound TRiO, Indiana University Indianapolis <i>Mentor</i> Mentor high school students through academic coaching, career guidance, and college readiness support.	May 2026 – Aug 2026
---	---------------------

SKILLS

Programming Languages: Python, SQL, R, SAS
Data Analytics and Machine Learning: Pandas, NumPy, Statistical Analysis, Random Forest, Logistic Regression
Health Informatics: EHR/EMR Systems, FHIR, HL7 v2, SNOMED CT, SDOH, Public Health Data
Data Visualization: Power BI, Tableau, Matplotlib, Seaborn
Tools: Jupyter Notebook, Git/GitHub, MS Excel, Visual Studio Code, MS Project

CERTIFICATIONS

- Walmart USA Advanced Software Engineering Job Simulation, Forage, Dec 2025
- Basic Life Support, American Heart Association
